Assignment #3   20 marks

Part A

1. Using the provided **photomerge.exe** images, which need to be unzipped, use the included files to create a panoramic photomerge image. Your photomerge should have the following elements:

   a) Your photomerge should include all 4 assigned images
   b) You must retouch your image to fix any elements that are not blended properly when photomerge is created using the Auto feature if required.
   c) You must crop the photomerge image so that it has no jagged edges.
   d) Your final photomerge image must be resized to 800 pixels in width and saved as **yourname_photomerge.jpg**.

Part B

1. Using the assigned **productbox.psd** file, use the tools available to you and create a box for a new product. Your product can be anything that you like, but you must complete the following tasks:

   a) Change the background of your page to a background that enhances your product box shot. The page background must not be white.
   b) You must add a large vector shape that will be wrapped around the box using the vanishing point grid features
   c) Add at least 4 different text layers to your product box front, with one large text layer being the name of the product. The product name text layer must have a stroke applied and at least one layer style applied.
   d) For the top of the product box, place a copy of your product name text logo and use vanishing point feature to fit it properly to the top of the box.
   e) For the side of the box, add 2 paragraphs of text which provide additional product information and use vanishing point feature to fit it properly to the side of the box.
   f) Make sure that all elements of the product box have the proper perspective applied to make it look realistic.
   g) Save the final product box file as **yourname_product.psd**. Make sure that you do not flatten your layers.
